

**Two brains,
one dude,
and a \$100 a week.**

What I've been doing in Claude · Darryl, 19 June 2026

WHAT'S COMING UP

Here's what I'll cover.

01

Why I built this

02

What I built

03

Demos

04

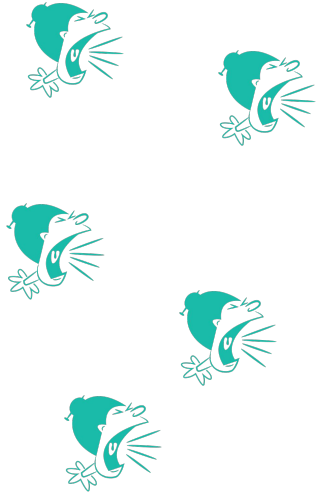

**What worked, what
didn't**

JACK

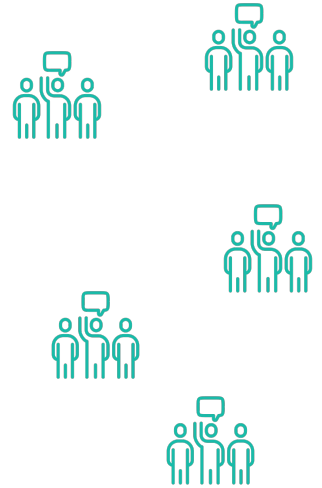

Just Ask Claude, Kids. (My biggest takeaway.)

02 — WHY

I am the bottleneck.

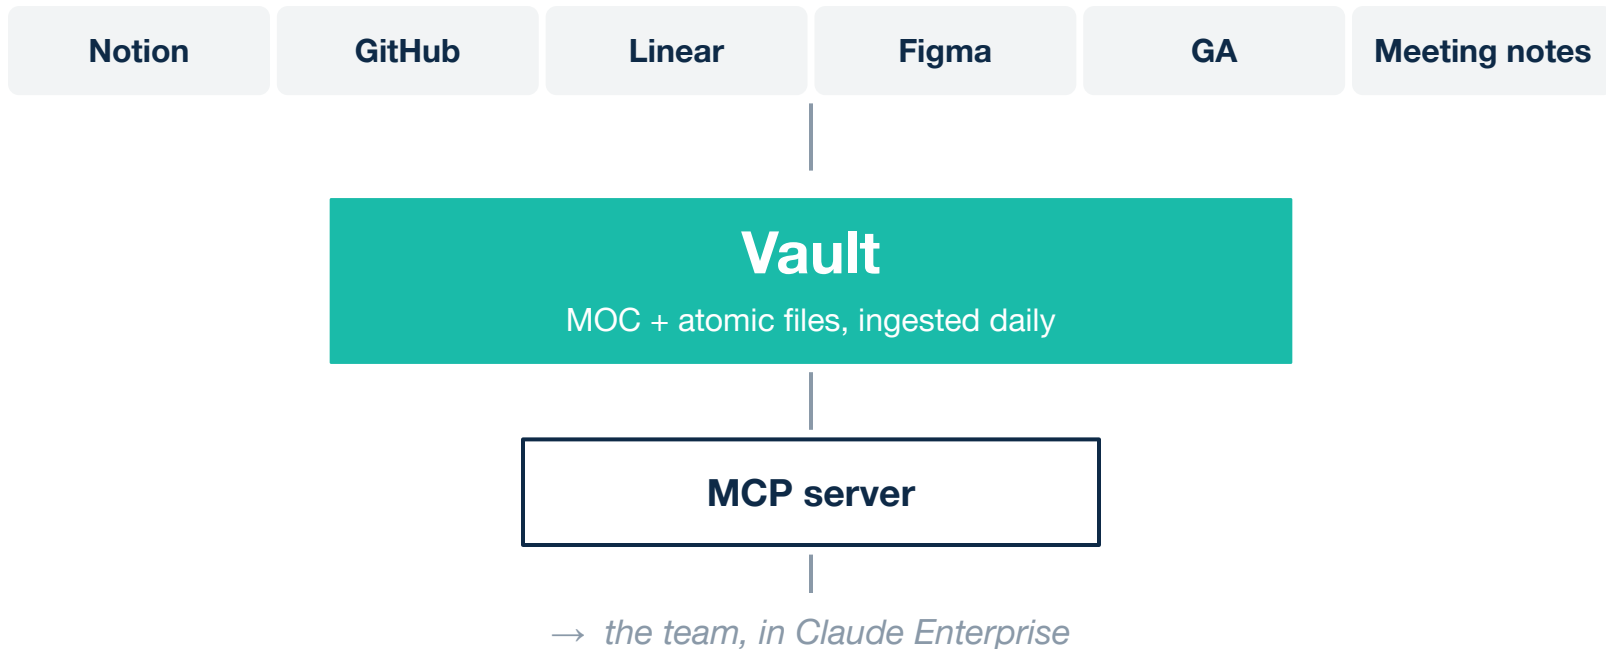

PSD STAKEHOLDERS

TEAM

The vault — a clerk who's read everything.

Darryl's brain APP 10:28

Morning sync 2026-06-19 — `0f1b8df`

Wiki: 152 pages · 0 new · 2 updated (sources: Figma)

Linear backlog: 58 items — 0 new since yesterday · 1 in progress · 2 delivered & pending review · 6 blocked

Backlog composition: 57% features · 21% chores · 3% bugs · 19% untagged

By product: 16 ATS/Harbour · 10 Orion · 8 G17 · 25 Jobs Portal · 2 unlabelled

Skills — recipes Claude already knows.

pm-principles

the substrate. My way of working, loaded on every session.

pm-skill-creator

the factory. Makes new skills with the right shape.

grill-me

the safeguard. Stops Claude before it builds the wrong thing.

my-voice

the polish. Anything written goes through here.

Workshop prep.

1–2 hours → under 10 minutes.

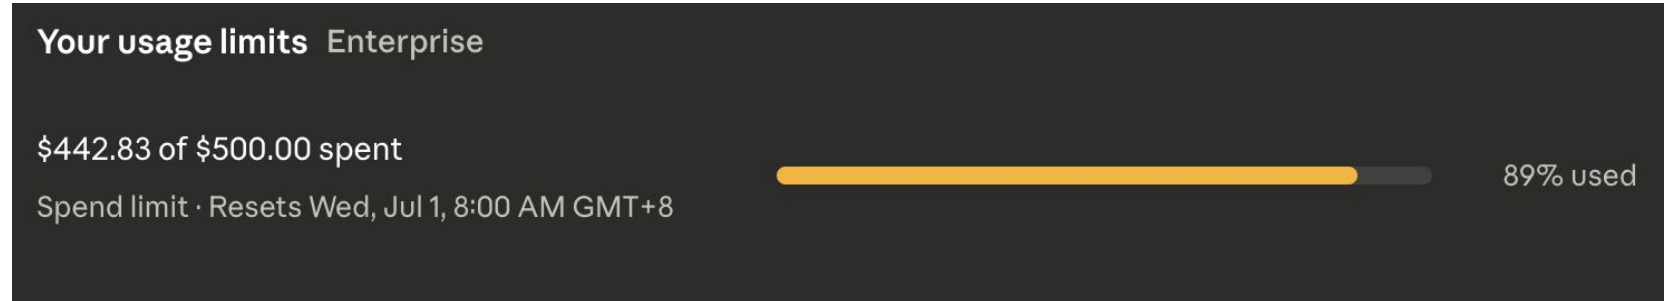

The DS update.

3–4 hours → under 10 minutes.

Workshop Synthesis.

~8 hours → under 10 minutes.

01 — WHERE THIS STARTED

My Anthropic console this morning.

1 June - Build: \$150 🏠
2-12 June - Refine: \$350
This week: \$90
This presentation: \$5

What worked, what didn't.

WORKED

- The Notion librarian day
- JACK — Just Ask Claude, Kids
- Skills as one-shot investments
- Letting Claude curate the vault

DIDN'T

- Skill triggers sometimes don't fire — refine the trigger phrases
- Claude's default context too narrow — a stakeholder update needs OKRs, roadmap, backlog, meeting decisions all stitched to one feature. Led to deep-search.

I haven't found a ceiling on this yet.

Every week the answer to "could Claude do this for me?" is yes.

- 01 Figure out what you want. Tell Claude in plain English. Let it work out the implementation. JACK.
- 02 Use a grill-me skill. Saves tokens. Saves you from Claude confidently building the wrong thing.
- 03 Be a librarian before you're an engineer. Tidy your docs. Codify your principles. Less rework later.
